

ILA Lesson Plan Template

Teacher Candidate Name: Justin Thall

Lesson Title/#: Thank you Ma'am

Grade Level:8

Lesson Foundations

Context: Students' Identities and Backgrounds (assets personal, cultural, community)	8th grade classroom in the midst of a unit on characterization and plot using "Thank You, Ma'am" as a text.		
Differentiation and Accommodations	Not yet		
Content Standards	RL.8.3 Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of a character, or provoke a decision.		
Learning Objective(s) "Students will be able to...SWBAT"	Students will be able to identify character traits in the text by using evidence found in the text. 	Assessment(s) & Criteria for Success Include LO being addressed	A T-chart showing the traits of both main characters in "Thank you, Ma'am". Two pieces of evidence for each character defending their reasons for those traits.
Essential & Compelling Questions	How is a character's characterization and personality traits shown through action and dialogue in the text?	Key Vocabulary/ Concepts	Characterization Character traits evidence
Materials & Resources (include text sets, print and non-print)	"Thank you, Ma'am" by Langston Hughes text Notebook paper (or t chart worksheet). A big board with dry erase features (or a document camera, whatever is more available). Printer paper.		
Theoretical Backing: My unit is going to try and use the students' schema involving character traits in the opening, and then hopefully using that activated schema to help transition them into attacking the text and using similar strategies. (I'm pulling from the Subject Matters text, Daniels and Zemelman, for this).			

Areas of focus aligned to the Pre-CPAST/CPAST:

(Use this space to be intentional about alignment with the Pre-CPAST/CPAST form. Notes about alignment and/or areas of focus to discuss with your supervisor and mentor.)

Management Intentions: What intentional management moves are you planning and using in your instruction to assure students will shine?

Instructional Procedures/Steps

Note when you are addressing a learning objective and when enacting an assessment. Utilize scripting during openings, closings, direct instruction, and check for understandings.

55	Teacher will... Engage Assess Support	Student will... What will students be doing? What evidence of learning will students demonstrate? Student-centered learning/opportunities for practice and application.
Opening ___10___ Minutes How will you begin the lesson to engaged students, activate prior knowledge, and communicate what students will be learning (student spark)?	Introduce Opening: "Think of two people in your lives who are different from each other. It can be any two people. Think about what their character traits would be if they were characters in a book: are they kind? mean? honest? smelly? resilient? Now take your notebooks and draw a big t chart like so" demonstrate a t-chart on the doc cam or whiteboard here, and instruct them to write their people's names (can be anon) at the top of the t's. Give a few examples on the board using the chart: my dog is smelly and dumb, something like that. Should take ~5 minutes to introduce, let them work on their own for the remaining 5 of the opening while you do administrative work (attendance, etc).	- Take out their notebooks. - Draw a t-chart in their notebook. - Identify traits of two people in their lives and fill it out onto the t chart.
Instruction ___20-25___ Minutes	Now we need to come back together and discuss these traits. Have some students share out, letting them	- Discuss as a large group their openings. - Explain their reasonings for their traits.

Procedure and steps: - Strategies - Assessments - Questions - Bloom's Levels - Planned Supports - Transitions What are the skills that are being assessed? What are the strategies to help with the skills? HOW are you teaching the skill?	laugh and enjoy themselves for a bit as it's a good release valve of a lesson. - As they go, or if they're struggling to share, ask things "What makes you say that? Why do you think that trait fits that person" - Point out these insights as they come up with them, have them start thinking about why they've come to their decisions and what sorts of things define a person in our minds. After some time, 5-7 minutes or so (let students energy help dictate how long this goes, if they're having a good time and figuring it out with lots of examples, that's good), Explicitly point out that what they've just done is very similar to what one would do when trying to identify traits of characters in a story, and how we would explain them. Tell them to take out their copies of "Thank you, Ma'am". As they do, hand out pieces of printer paper or loose leaf paper. Have them draw a big T chart on the paper and write the names of both characters in the text at the top. Do the same on the whiteboard in a new T chart. Having read the text the day before, open the lesson up to the students and see if they can start coming up with traits (1 trait for each, for now). If they're struggling, provide two that they can see very early on in the text: Desperate for Roger and Strict for Mrs Jones. You need to start modeling the criteria you want and how to achieve it. You can probably start at the first trait given, for Roger, whether it's Desperate or	- Take out their texts - Draw a t chart on a piece of printer paper and write the names of the main characters, Roger and Mrs. Luella Bates Washington Jones. - Coming up with a character trait for each character, we'll take 2. - Turn and talk about why they think Roger shows whatever trait we're using. - Come back together and discuss their findings with you. - Find a piece of evidence for Mrs. Jones's character trait on their own, to come back to the class and discuss together.
---	--	--

	something they come up with, and ask “How do we know that Roger is X trait? Where does that come up in the story?”. This is probably a good time for a turn and talk with their classmates, let them read through the first page of the text and look for some evidence. After a few moments, bring them back and let a few groups call out answers. Write them as bullet points under the traits on the t chart. If they’re struggling, model it. Take Desperate or the trait X, and show them a piece of evidence. Explain how you’ve made that connection, and maybe even add multiple pieces of evidence to show how the author really wants to hammer this home. If you have a doc cam, could be a good use of it. NOTE: SHOW some examples of actions AND dialogue. This takes a good amount of inferencing, so demonstrate how you came to those inferences. Now move on to the one trait for Mrs. Jones. Let them try finding evidence on their own this time. Walk around and see what they’re doing, looking at what they’re looking at. Bring attention back to the front and repeat the process as before. get a few pieces of evidence, have some discussion about why they fit. By now, they’ve probably got the memo, but you could always find another trait and continue the teaching process, adjusting the teaching based on what they’re struggling with.	
Closure	Now we transition into the exit ticket/assessment.	

____20____ Minutes How will you close the lesson and close the class period?	Release them to work on finding more traits for each character and sourcing evidence. They can work in groups, and it may be more engaging. They'll all be turning in their t charts WITH THEIR NAMES ON IT. It isn't graded and they'll get it back tomorrow, you're just going to give it a good skim and see if there are recurring issues that need to be addressed. On the board, write the criteria: You want at least 2 traits for each character with one piece of evidence for each trait. That totals 4 traits and 4 pieces of evidence. If we went over in the last section, cut it in half. During this process, walk around and see what they're talking about. Guide them back on topic if needed, but also prompt them if they're struggling or start up some conversations for quieter groups. Keep note on who seems to be thriving and who seems to need more help. Have them turn it in at the door as they walk out of class.	- As groups, continue their t charts by finding more traits and more evidence for those traits. Follow the criteria: 2 more traits for each character, and one piece of evidence for each trait (or less if we cut for time). - Hand their chart in at the end of class.
